

MESSAGE TO THE PEOPLE FROM THE PEOPLE

Dear Citizens,

It is with strength, respect and determination that we, the sovereign people of the earth, and of France, send you this message !

At a time when we, the people, are confined in our houses, and those have been turned into personal prisons, our prison walks are made of fear, we have the obligation to present a "passport" worthy of the 1940 war in France, to present to the police or the new Gestapo ; we make our "Traversée de Paris" in fear of the militia.

In fact we have realized, thanks to the current situation in our country, those who govern us take advantage of the situation to pass laws without asking our opinion, going from decree to decree, all more liberal and criminal than the others ! The laws on medical treatments, prohibited treatments, the chloroquine that for 70 years has been distributed without a prescription, and prescribed for many different diseases, in addition to COVID-19, even the government's delirium that is getting corrupted by the pharmaceutical lobbies, the laws in favour to the 5G's, to install the antenas wherever they want despite the risks to the people security, make this country today, the worse country in the world to grant all privileges to the mobile phone companies, allowing them to kill us with their toxic waves, and this is scientifically proven.

This handful of men, elected to protect the French people, have allowed themselves to imprison the people under the pretext of a flu virus that is largely controllable by our collective and private responsibilities for hygiene and prevention. This handful of irresponsible rulers and flamboyant amateurs have done everything to limit our less fundamental freedoms under false and criminal pretexts !

The disappearance of chirurgical protective masks, chirurgical paper vest and garments going to shreds, including the chloroquine scandal, our gouvernement forbids it. The chloroquine scandal, the incoherent medical isolation, the scandal of tests that

are ineffective on the one hand and banned on the other to hide, absence of the true statistics of contagion, the defective Chinese medical equipment that causes allergies, mouldy materials, protective clothing that falls apart, putting at risk and placing the French hospitals at the level of a Third World country ; banned, hidden and never mentioned medical care and treatment, the lack of consideration for the right diagnostic of the epidemic disease by treating it anyway with the wrong medical tools.

COVID-19 pneumonia ? Of course not, because the respiratory difficulties are linked to a blood oxygenation problem, it looks like pneumonia, but it is not and is treated as such. Voluntary ignorance of French health authorities about the actual diagnosis of this pandemic.

Our rulers laugh at us, play with the lives of the people without the slightest scruple, while continuing in their old paradigms of lies and endless debts, which lead us straight to an economic and social crisis even more devastating than the 1929 economic crisis.

- "It will then, become our true pandemic."

The time has come for us, the earth people, the French people to express with firm determination our indignation and our rejection of all this comedy !

You who applaud the nursing staff every night ! Be worthy of them !

That is why, every day from Sunday, April 12, 2020 at 14:00, we must make our anger known through our windows, doors and balconies, and make the pots and pans ring and hang banners from our House/prisons to shout out our anger and our disagreement with this criminal policy.

Of course, this message is the first warning shot of the people to the State! The next one will be for our liberation from the joke of this dictatorship methodically established by those who govern us and their ministry !

A big thank you to us, we are the people of the earth, of today, of tomorrow...

Strength and courage to all
